

Port Colborne Long Term Care Facility*, Port Colborne
Client: The Regional Municipality of Niagara

*Joint Venture with Montgomery Sisam Associates Inc. Architects

This long-term care facility is comprised of 150 resident beds on three levels. The ground floor contains common living/community space with a multi-denominational Chapel. The home also contains a daycare program space for residents within the community to participate in special activities. The home is physically connected to the local hospital with the idea of sharing medical facilities as needed. The home is orientated south overlooking the waters of Lake Erie.

Project Size: 100,000 Sq. Ft.
Constriction Budget: \$15,415,000
